**This system is designed for low maintenance,
with speeds similar to traditional manual operation.
The smooth and continuous operation makes for a SAFER, LARGER OUTPUT OVERALL.**

[Capacity]

Cycle time per stick ... Approx. 4 ~ 5 sec/stick (per 1 production line of continuous smoke house)

Casing Type ... Natural casing, Collagen casing, Cellulose casing

[Others]

Current HITEC linkers you have are retrofitable to run with automation system.
