HIGH SPEED LINKING AND HANGING SYSTEM FOR ALL TYPE CASING

PATENTED

LINKWEL LINKWEL-L

TYPE FOR NATURAL CASING
TYPE FOR NATURAL AND ARTIFICIAL CASING

LINKWEL LINKWEL-L

The world's first equal-length, equal-weight, and equal-diameter sausage stuffing machine for natural casing.

Independent Electrical Control for Drive

Metering Pump, Twister and Stuffing Tube Rotary Head, Linking Chain, and Conveyor are driven by motors independently and each motor is under separate electrical control. Such independent drive and separate control achieves high speed stuffing of sausages made with natural casing. In addition, structure of drive transmission made as simple as possible has not only reduced the number of parts used but also improved durability in drive transmission parts, thus preventing occurrence of troubles and cutting substantial time, cost, and difficulty in maintenance.

A redesigned main body

Housed by a completely redesigned main body, all components are very easily accessible. The new "unibody" construction design of the main body not only offers exceptional strength but also insures no problems due to water invasion.

Improved electrical design

All electrical components are housed separately in an exclusive stainless steel waterproof box. Thanks to a much wider door opening, operations such as parts exchanging can be performed very easily.

One with an automatic casing feeder processes casings of all types and the other is exclusively used for natural casing. "LINKWEL" is the most suitable machine for any kind of casings including sheep, hog, collagen, and cellulose.

"LINKWEL" is the equal-length, equalweight, and equal-diameter sausage stuffing machine for natural casing.

In the conventional production sausages of natural casing sausages, it was considered impossible to make weight and length of sausages constant. However, our new product "LINKWEL" is the world's first sausage stuffing machine that has realized production of natural casing sausages with equal weight as well as equal length.

"LINKWEL" can minimize breakage of casings during stuffing.

As it employs a stuffing method different from the conventional ones, it drastically decreases the frequency of casing breakage due to a success in a sharp decrease of pressure on casings during stuffing.

"LINKWEL" achieved high-speed production of natural casing sausages.

It is a machine completed with an idea quite different from the conventional stuffing theory for natural casing sausages. It has realized a production with much higher speed than the conventional natural casing sausages stuffing machine. In addition, since it can be connected including an operation of hanging sausages on rods.

"LINKWEL" has 2types

This type of "LINKWEL" can stuff all casing including sheep casing, hog casing, collagen casing, and cellulose casing. Changeover of a product is very easy and even the changeover from natural casing to artificial casing to natural casing is so simple. This changeover without special tools and skill can be made by an operator and exchange work including all of the parts and change in setting-up can be finished within 10 minutes.

Stationary chute

A revolutionary breakthrough over the conventional looper horn which moves to hang product over hooks. Our system allows precise hanging by simply allowing the product to "side" to the conveyor hooks without the need for more wear parts as on a looper system.

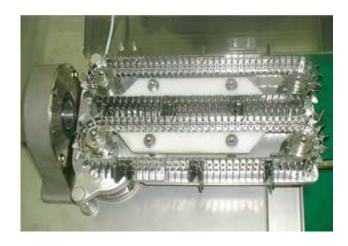

Maintenance free no oil twisting system

Never have to concern about leaks. Direct drive from motor with timing belt brings fewer components and extended parts life. When necessary, replacing parts is done quickly and easily without the need to remove the entire twister assembly.

More durable metering pump

The metering pump offers increased durability compared to conventional ones. Our design offers excellent long term weight control with less necessary overhauls. A magnetic clutch starts and stops the pump precisely without slippage offering exact front ends and tails.

Various Linking Chain

Available in various lengths from 3 piches (28.56mm), as well as half pitch (4.76mm). Also capable of straight stuffing (no twist).

Separation of pneumatic parts and electrical parts

Complete separation of pneumatic parts and electrical parts allows easy and safe repair/adjustment.

Sanitary draining system

The standard type is equipped with Water Saucer and Water Chute to get water flow into one place.

OPERATOR FRIENDLY MONITOR

All your necessary information displayed at a moment's notice, quick and easy.

Easy changing of products

Easy as 1.2.3.

- 1. Confirm you have the correct linking chain, tube size, chuck, and hopper adjustment.
- 2. Select the desired preprogrammed product code.
- 3. Push the start button.

Everything is stored and predetermined. Machine speed, pump speed, front and tail of casing, twist, etc, the same every time!!!

Production control

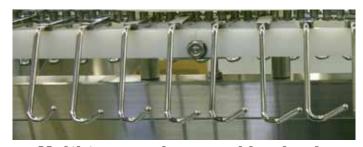

All vital data including cycles run, set point, etc can be checked at anytime.

Maintenance and troubleshooting

If any type of problems occur during operation, its location will be displayed immediately. Also, it can quickly be resolved with a flow chart for the machine.

Hitec Hook Design Options

Multi type casing round bar hook

Natural casing plate hook

Other hook designs available for ring sausage or other specialized applications.

Omron

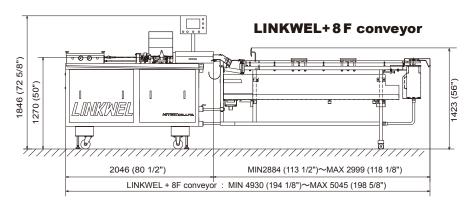

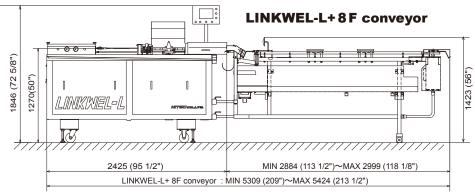

Allen-Bradley

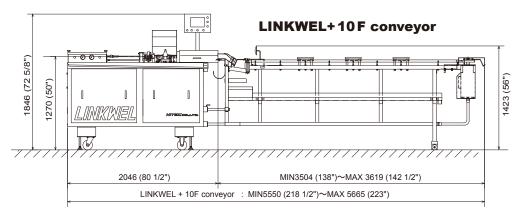

Easy to operate, non proprietary electronic components and controls. Omron, Mitsubishi or Allen Bradley, the choice is yours.

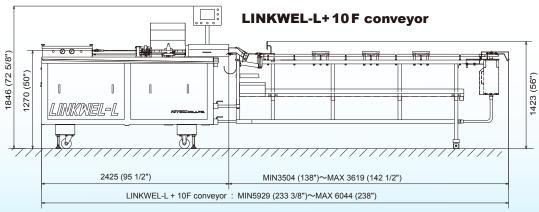

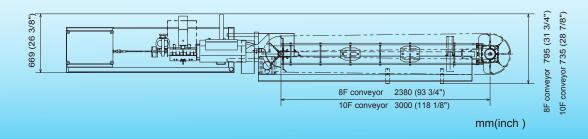

OVERALL DIMENSION

■ SPECIFICATION

Production Rate	Artificial Casing	Max. 7,000 lb/hr (3,200kg/hg)	
	Natural Casing	Max. 800pcs./min	
Dependent on casing quality, pr	oduct size, weight and/or factor	y conditions.	
Product Size	Artificial Casing	3 pitches (28.6 mm, 1 1/8 in) through 32 pitches (304.8 mm, 12 in) or more.	
	Natural Casing	3pitches (28.6 mm , 1 1/8 in) through 20 pitches (190.5 mm , 7 1/2 in) or more	
Longer sizes can be applied with HITEC'S optional unit.			

Casing Size		LINKWEL LINKWEL - L			
	Sheep Casing	14mm \sim 25mm
