# Raw materials delivered from the stuffing machine are portioned and discharged in fixed-weight ball shapes!

## ◀ **BALL FORMER**

- This machine portions raw materials delivered from the stuffing machine into fixed-weight ball shapes and discharges them simultaneously from each outlet.
- Our proprietary technology ensures high weight accuracy for precise portioning.
- The discharged material is shaped into uniform balls using a slide-type cutter.
- Discharge ports are available in single or double types.
- The discharge unit is easy to take apart and clean, ensuring hygienic use.

Discharge port (double type)

It is also possible to install a belt conveyor for continuous production.  
(The belt conveyor is optional.)

Easy to move with casters.

### Products That Can Be Produced

The machine is designed to handle a variety of raw materials, such as meatballs, fish balls, and more.

Meatballs

## Connecting to the Vacuum Stuffer "STUFFWEL" from HITEC improves production efficiency and reduces costs.

STUFFWEL 51

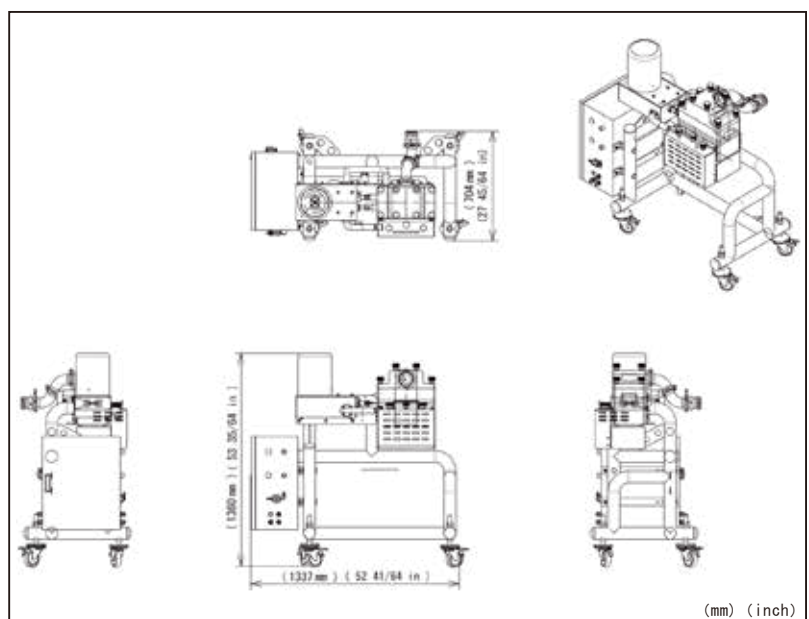

STUFFWEL 219

STUFFWEL 222

Examples of Connections:  
STUFFWEL 51 + BALL FORMER
