

◀ **FLOW DIVIDER**

HITEC

www.hitec-jp.com

Material from the stuffing machine is precisely portioned and discharged through multiple ports at the same time !

◀ **FLOW DIVIDER**

- This machine accurately portions material from the stuffing machine and discharges it simultaneously through multiple outlets.
- Our proprietary technology ensures precise portioning with high weight accuracy.
- The discharged material is evenly cut into portions by the flow cutter.
- The discharge unit is easy to replace and adjust, making it suitable for a wide range of applications.
- We can customize the number and shape of discharge outlets to suit your specific needs.

Discharge outlets can be designed in a variety of shapes, such as round, square, triangular, or star-shaped.

Long and narrow discharge shape.
Cut length can be adjusted easily.

Easy to move with casters.

Products That Can Be Produced

Designed for handling a wide variety of materials, including meatballs, barrel-shaped croquettes, elongated pet food, bread dough, and highly viscous fish paste.

Meatballs

Croquettes

Pet Food

Connecting to the Vacuum Stuffer "STUFFWEL" from HITEC improves production efficiency and reduces costs.

STUFFWEL 51

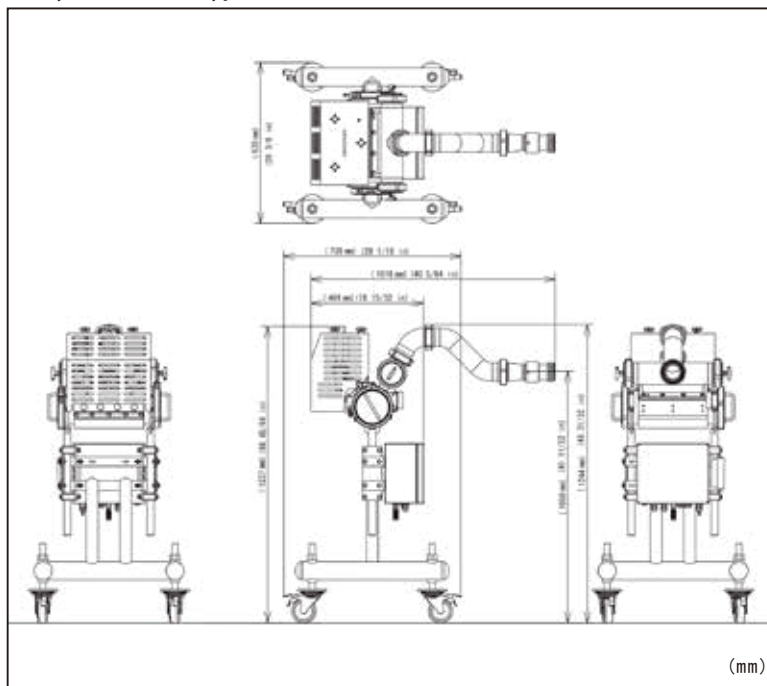

STUFFWEL 219

STUFFWEL 222
